

Philosophy

“Quality is not a coincidence but the result of good work!”

Good work means to us:

- Accurate and professional appropriate work at modern level of knowledge,
- Processing in due time,
- Co-operative attitude of internal work and external work,
- Professional work free from ideologies,
- Ecological and social responsible action,
- Fair fees

Environmental Planning and Scientific Consulting

Environmental Planning

Basic Data Collection

Our team is accomplishing research, mapping and surveys of diverse topics and requirements:

- Ecological inventory collections and evaluations
- Biotope/ habitat mapping
- Vegetation mapping, flora and fauna survey
- Geomorphologic and soil mapping
- Bio monitoring and efficiency control
- Habitat care and development planning
- Renaturation and recultivation (reclamation) concepts including practical realisation

Landscape Planning

- Environmental Impact Assessment
- FFH Impact Assessment
- Land Use Planning / Master Plan
- Encroachments in Nature and Scenery,
- Compensation of Interventions

Construction Supervision

The realisation of landscape management conservation measures requires an implementation thoroughly planned.

Risk Analysis

You are not sure whether the realisation of your project might have an impact on the environment? Or you may need advice on legal regulations and guidelines to be observed?

Our team examines for you –

- Environmental regulations (EU and national law, community and state law, community decrees and bylaws)
- Probable/ expected impact on the environment and related evaluations (e.g. flora, fauna, vegetation, soil, water, air, climate, landscape, recovery etc.)

and Scientific

Special Expertise Other Professional Opinion:

Our team is strongly committed to interdisciplinary work, even for complex multidisciplinary questions.

We realised successful project in the following areas:

- environmental conformity usage for factories, buildings or open areas
- location analysis
- surveys for fauna, limnology, hydrology, geology etc.
- concepts of ecologically beneficial tourism
- concepts for riding paths
- location of parking space for caravans
- advice for agriculture
- concept and realisation of learning trails
- vocational training, excursions, presentations

Feel free to ask us!

Geo Information

For preparation and visualisation of space-related data a firm handling of relevant digitising software tools is important. Moreover, profound professional know-how for correct interpretation of data is necessary.

We assure both aspects and offer the following services:

- digitisation of maps and plans
- digitisation of land use plans and landscape plans according to VO
- cartographic editing
- thematic maps of various kinds
- space analysis
- data conversion
- data research

We work with the latest versions of the state-of-the-art software tools such as GISPAD, ArcView, ArcMap and MapInfo.

**We are your partner
for all environment-related tasks!**

Consulting

Who we are

Dipl.-Ing. agr. Helmut Dahmen
(Agricultural Engineer M.Sc.)

Dipl.-Ing. agr. Dr. Dorothea Heyder
(Agricultural Engineer M.Sc., Ph.D.)

Dipl.-Biol. Maria Luise Regh
(Biologist M.Sc.)

Dipl.-Geogr. Christian Rosenzweig
(Geographer M.Sc.)

Additionally, an established team of external specialists of fauna, limnology, hydrology, geology as well as plotter-service and repro-service works with us on demand.
